SCOPE

Water and Environment Journal is the Journal of the Chartered Institution of Water and Environmental Management (CIWEM). Readership and authorship is principally from environmental professionals or from those who have an interest or involvement in environmental issues, both in the UK and globally. The journal is widely read by professionals working in academia, consultancies, Government, regulators, NGOs and the environmental industry. Recent papers have included the following subject areas:

- Land use and groundwater use
- Water conservation
- Integrated water management
- Flood alleviation, flood estimation and floodplain modeling
- Sewage sludge digestion
- Urban sewerage
- Granular activated carbon performance
- Membrane bioreactors
- Constructed wetlands
- Pollutant build-up and run-off
- Cryptosporidium risk assessment
- Bacteriological and chemical quality of drinking water
