

Food Waste is a Big Climate Problem We Can Actually Solve

visualising data can help us understand & tackle some of the world's profound challenges

waste by food type

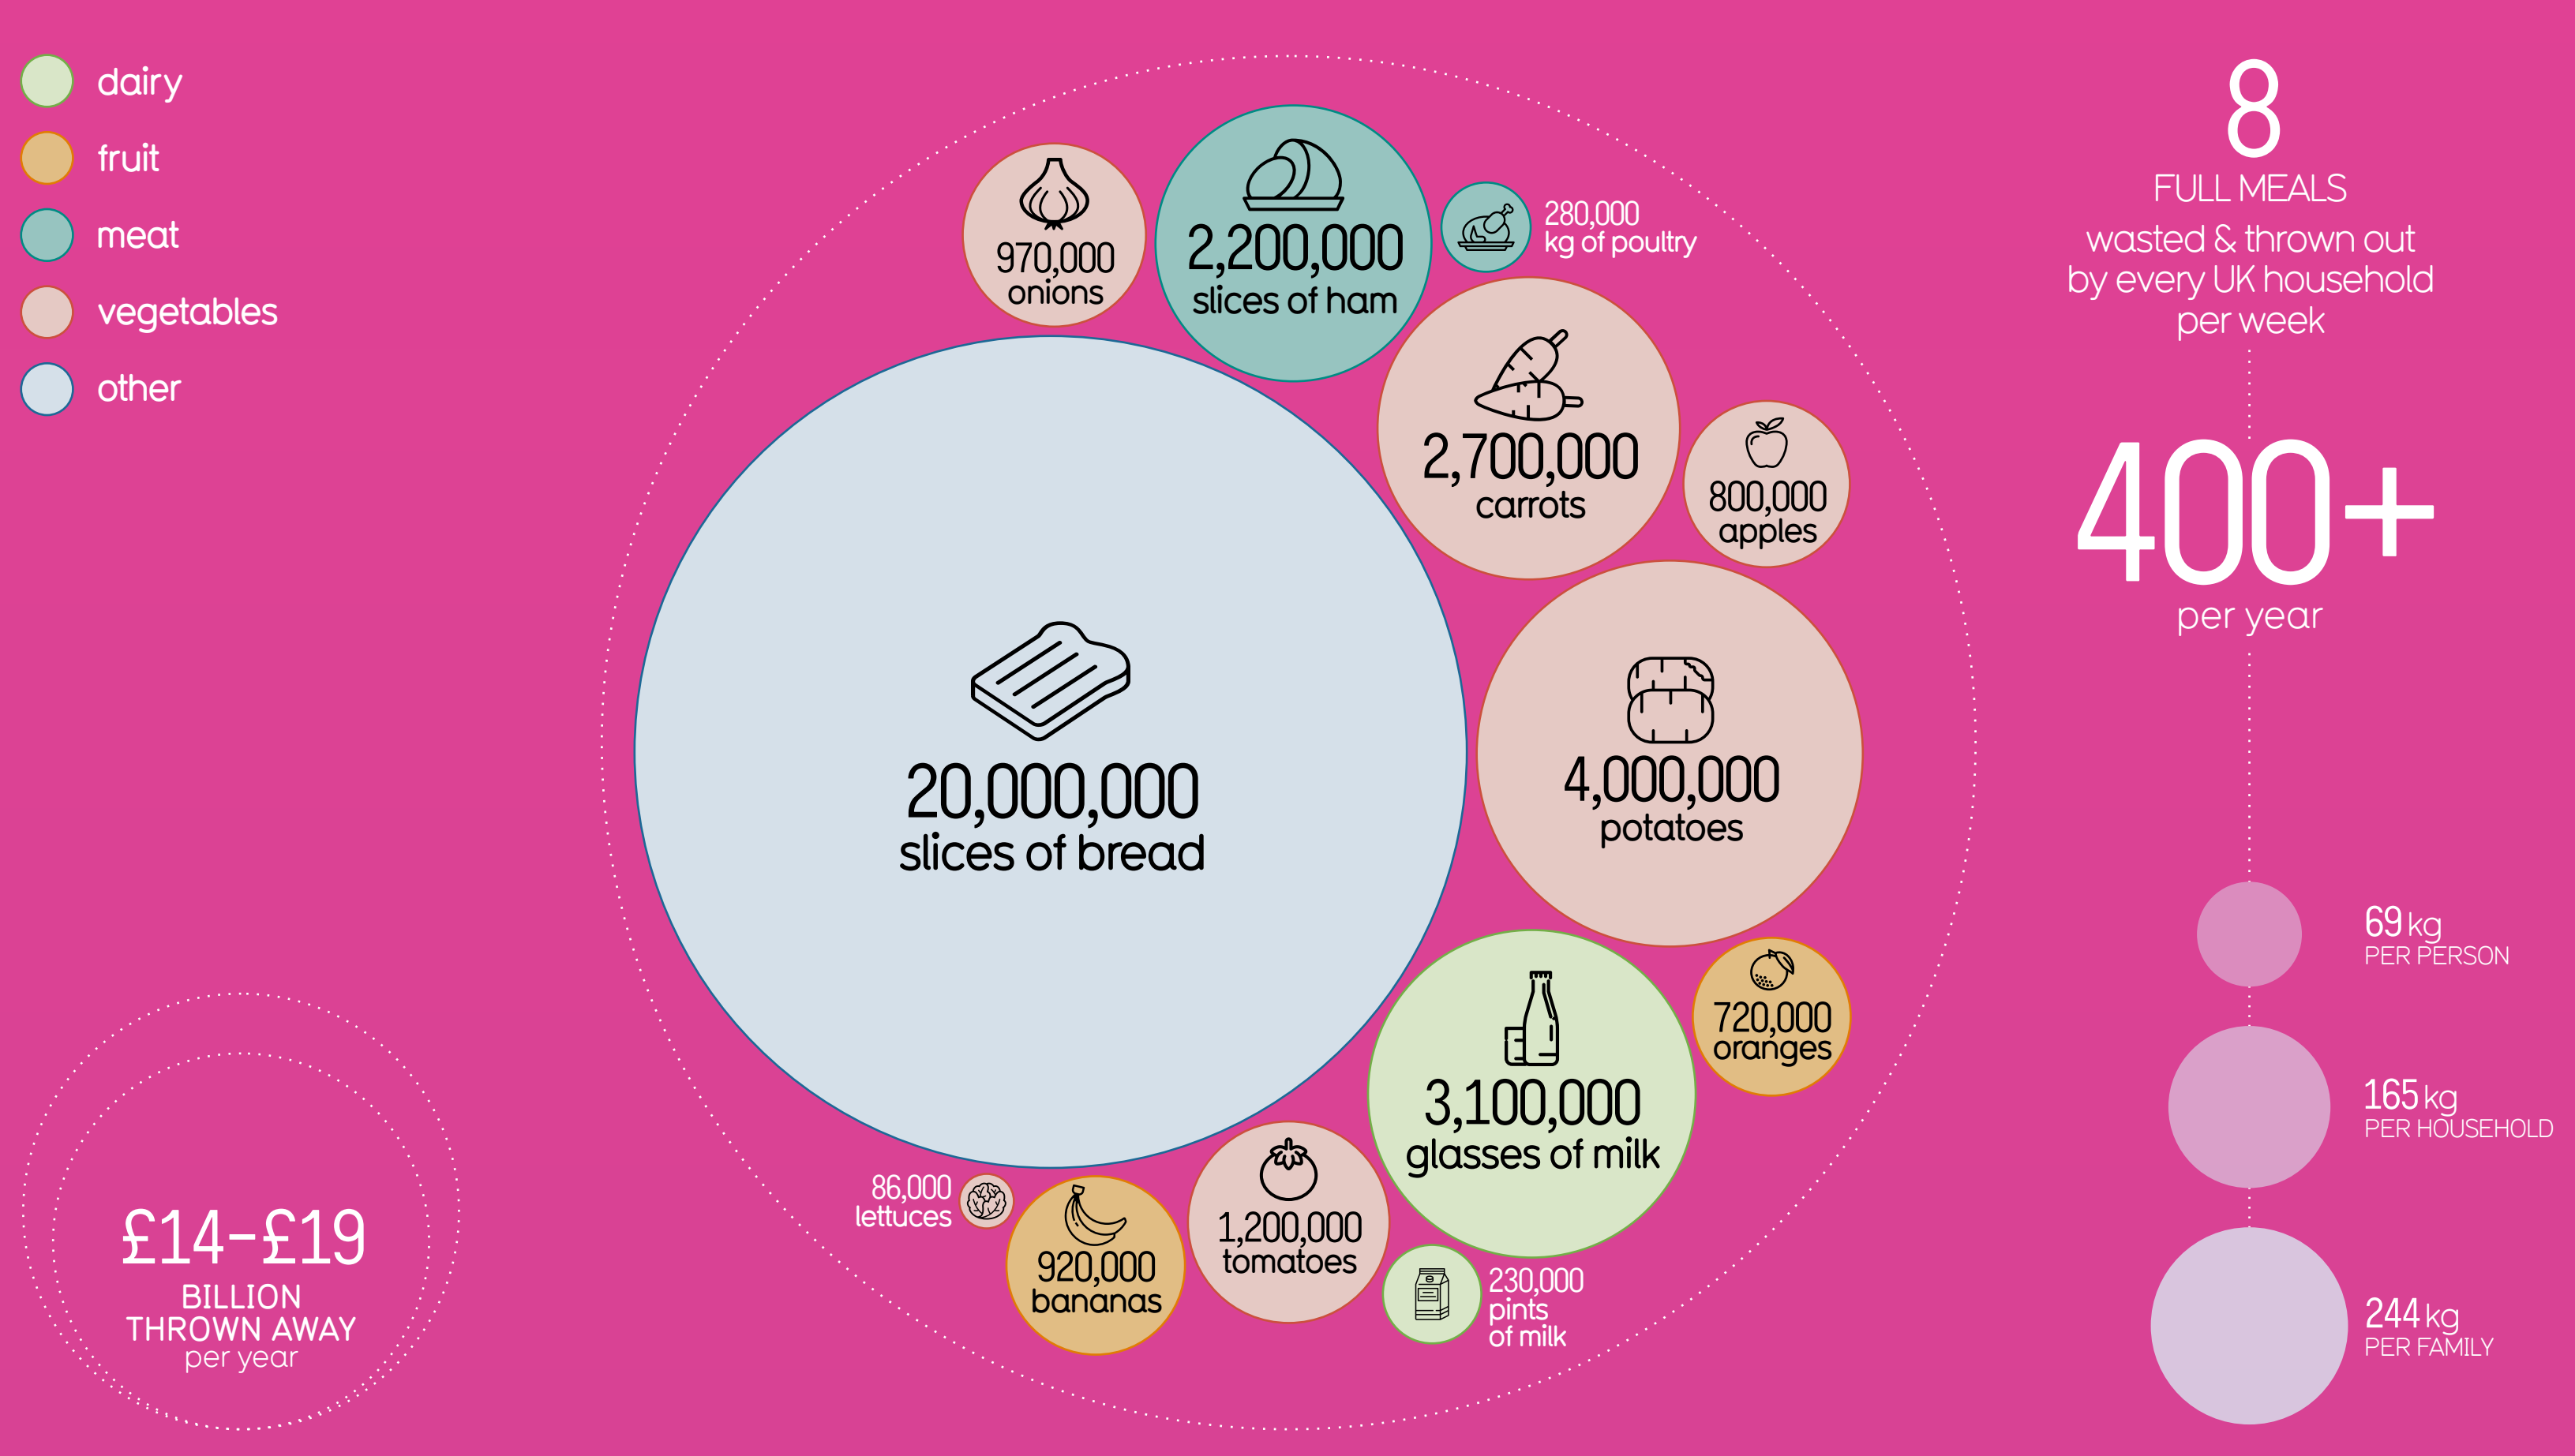

If food waste was a country, it'd be the fourth biggest for emissions

greenhouse gas emissions per year

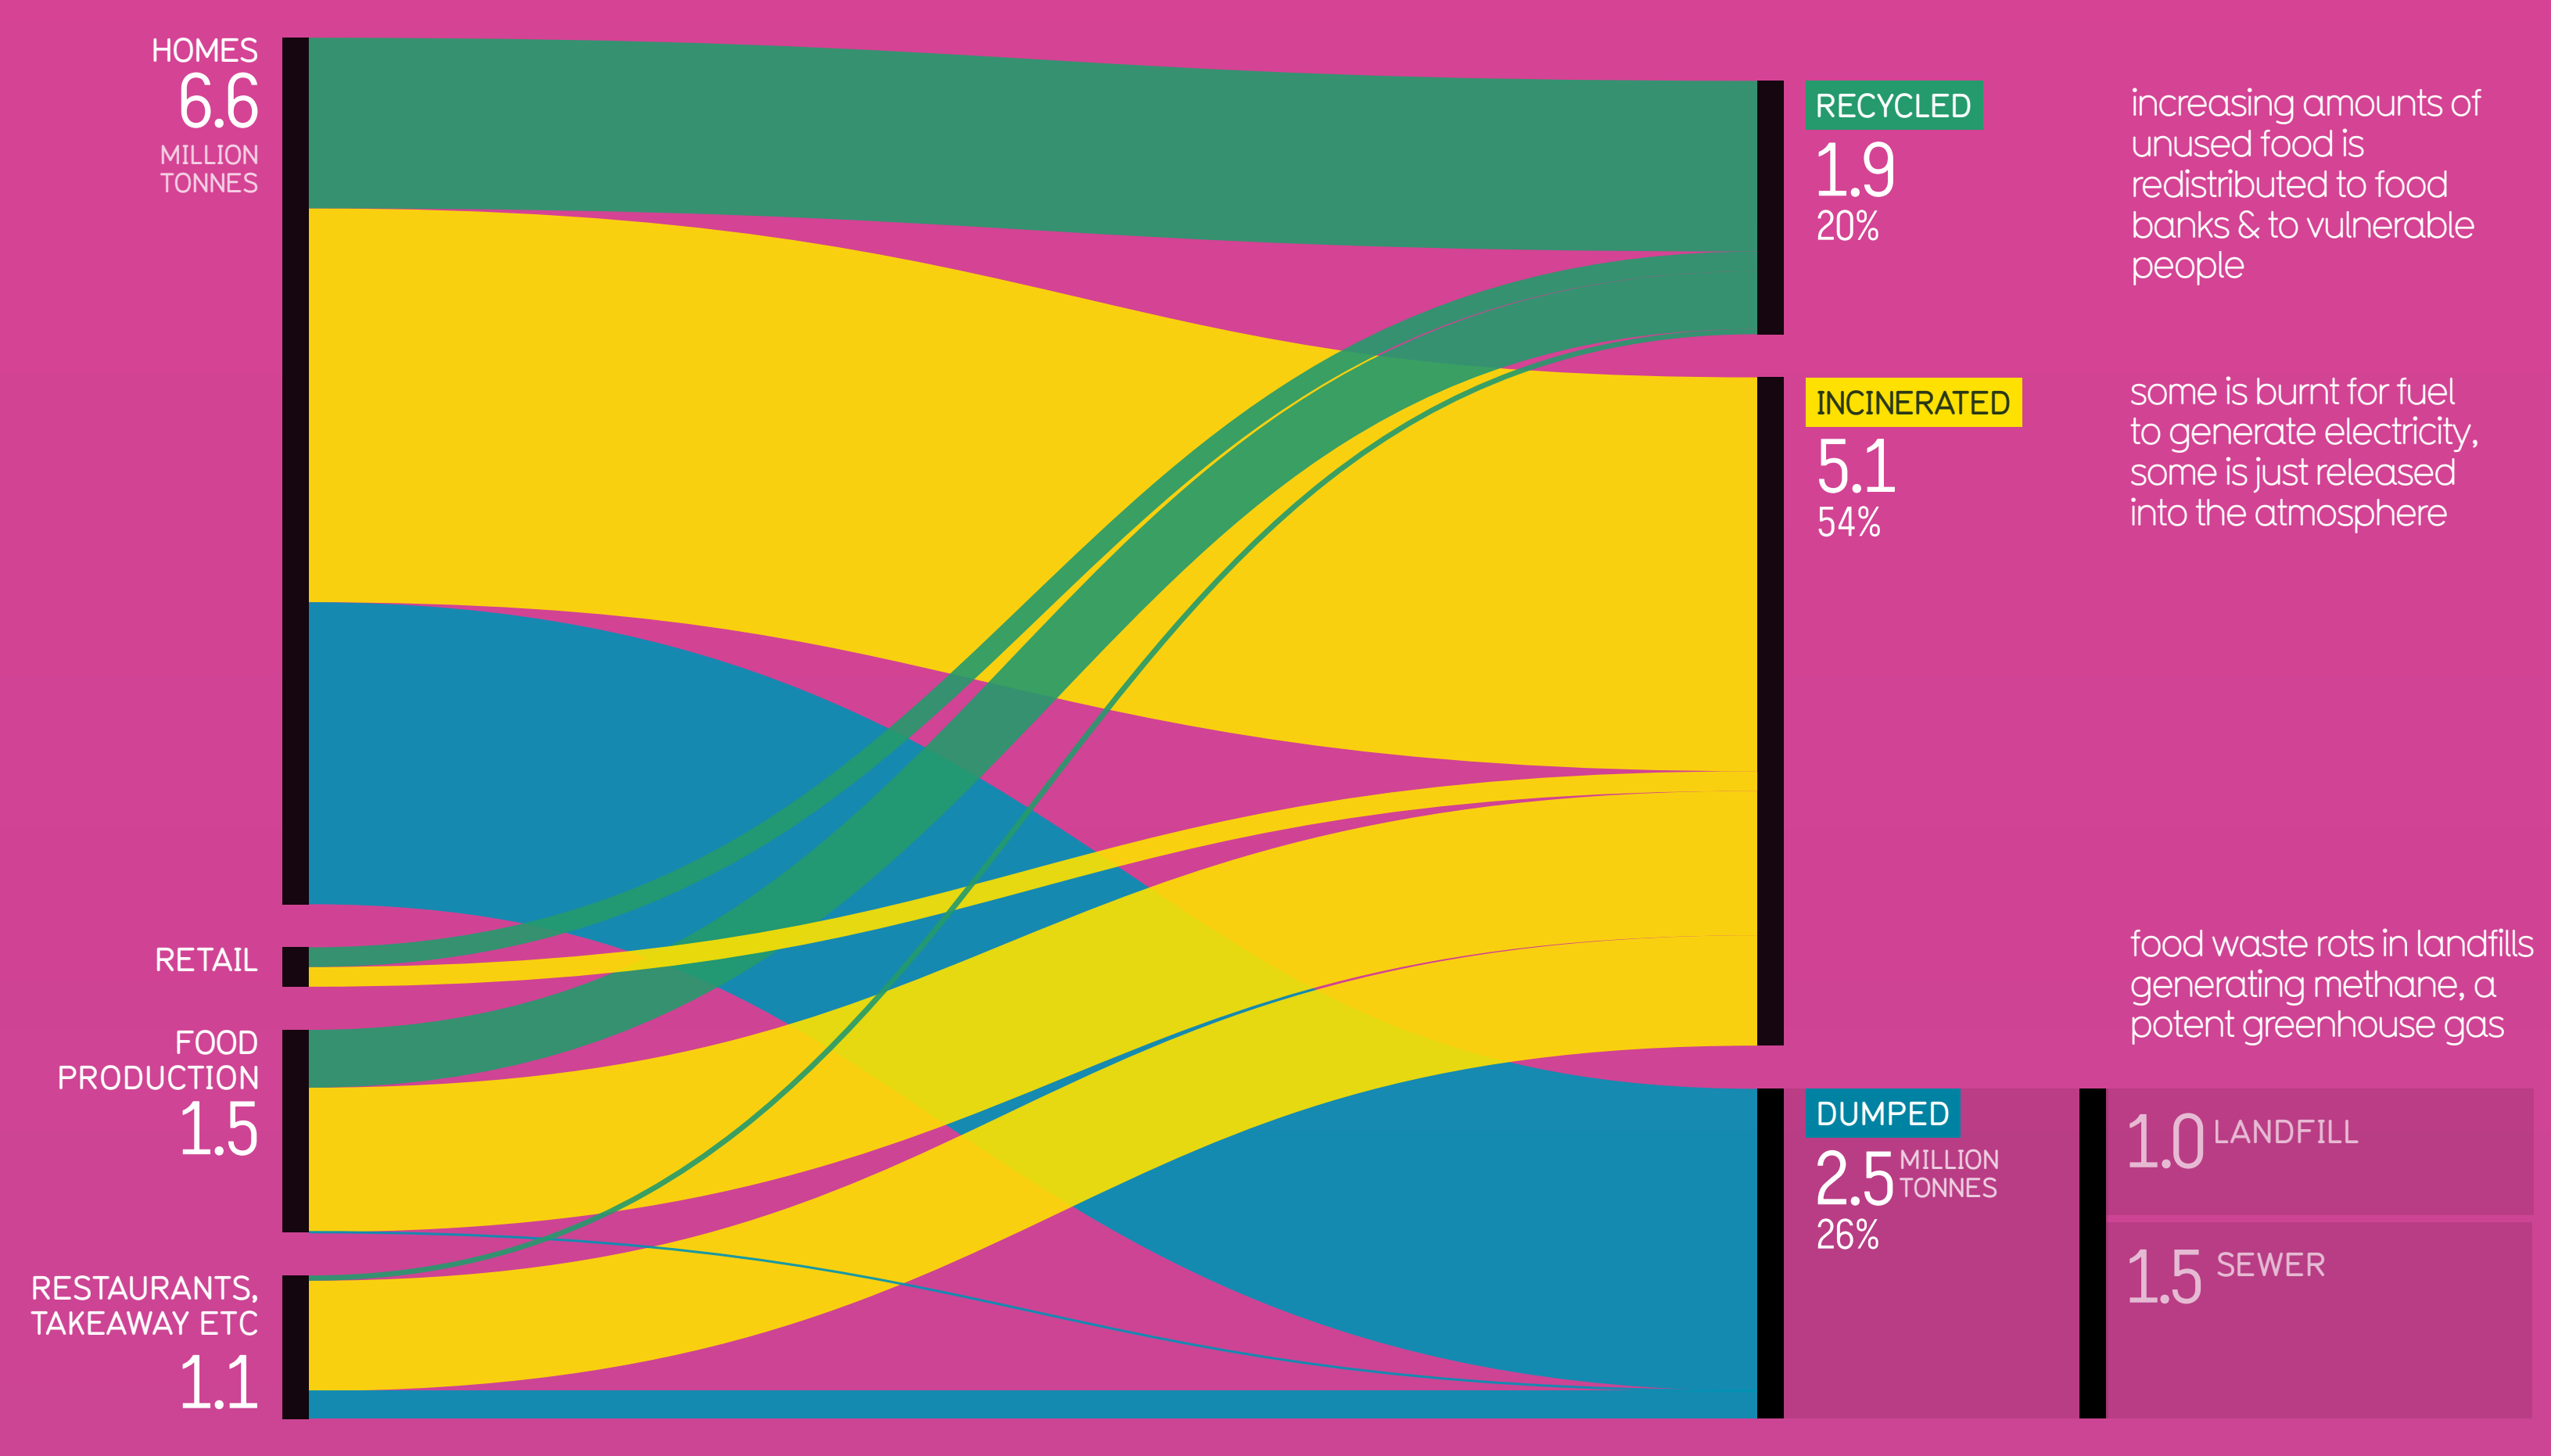

Food Waste in the UK

What we waste everyday

Most ends up in landfill or incinerators

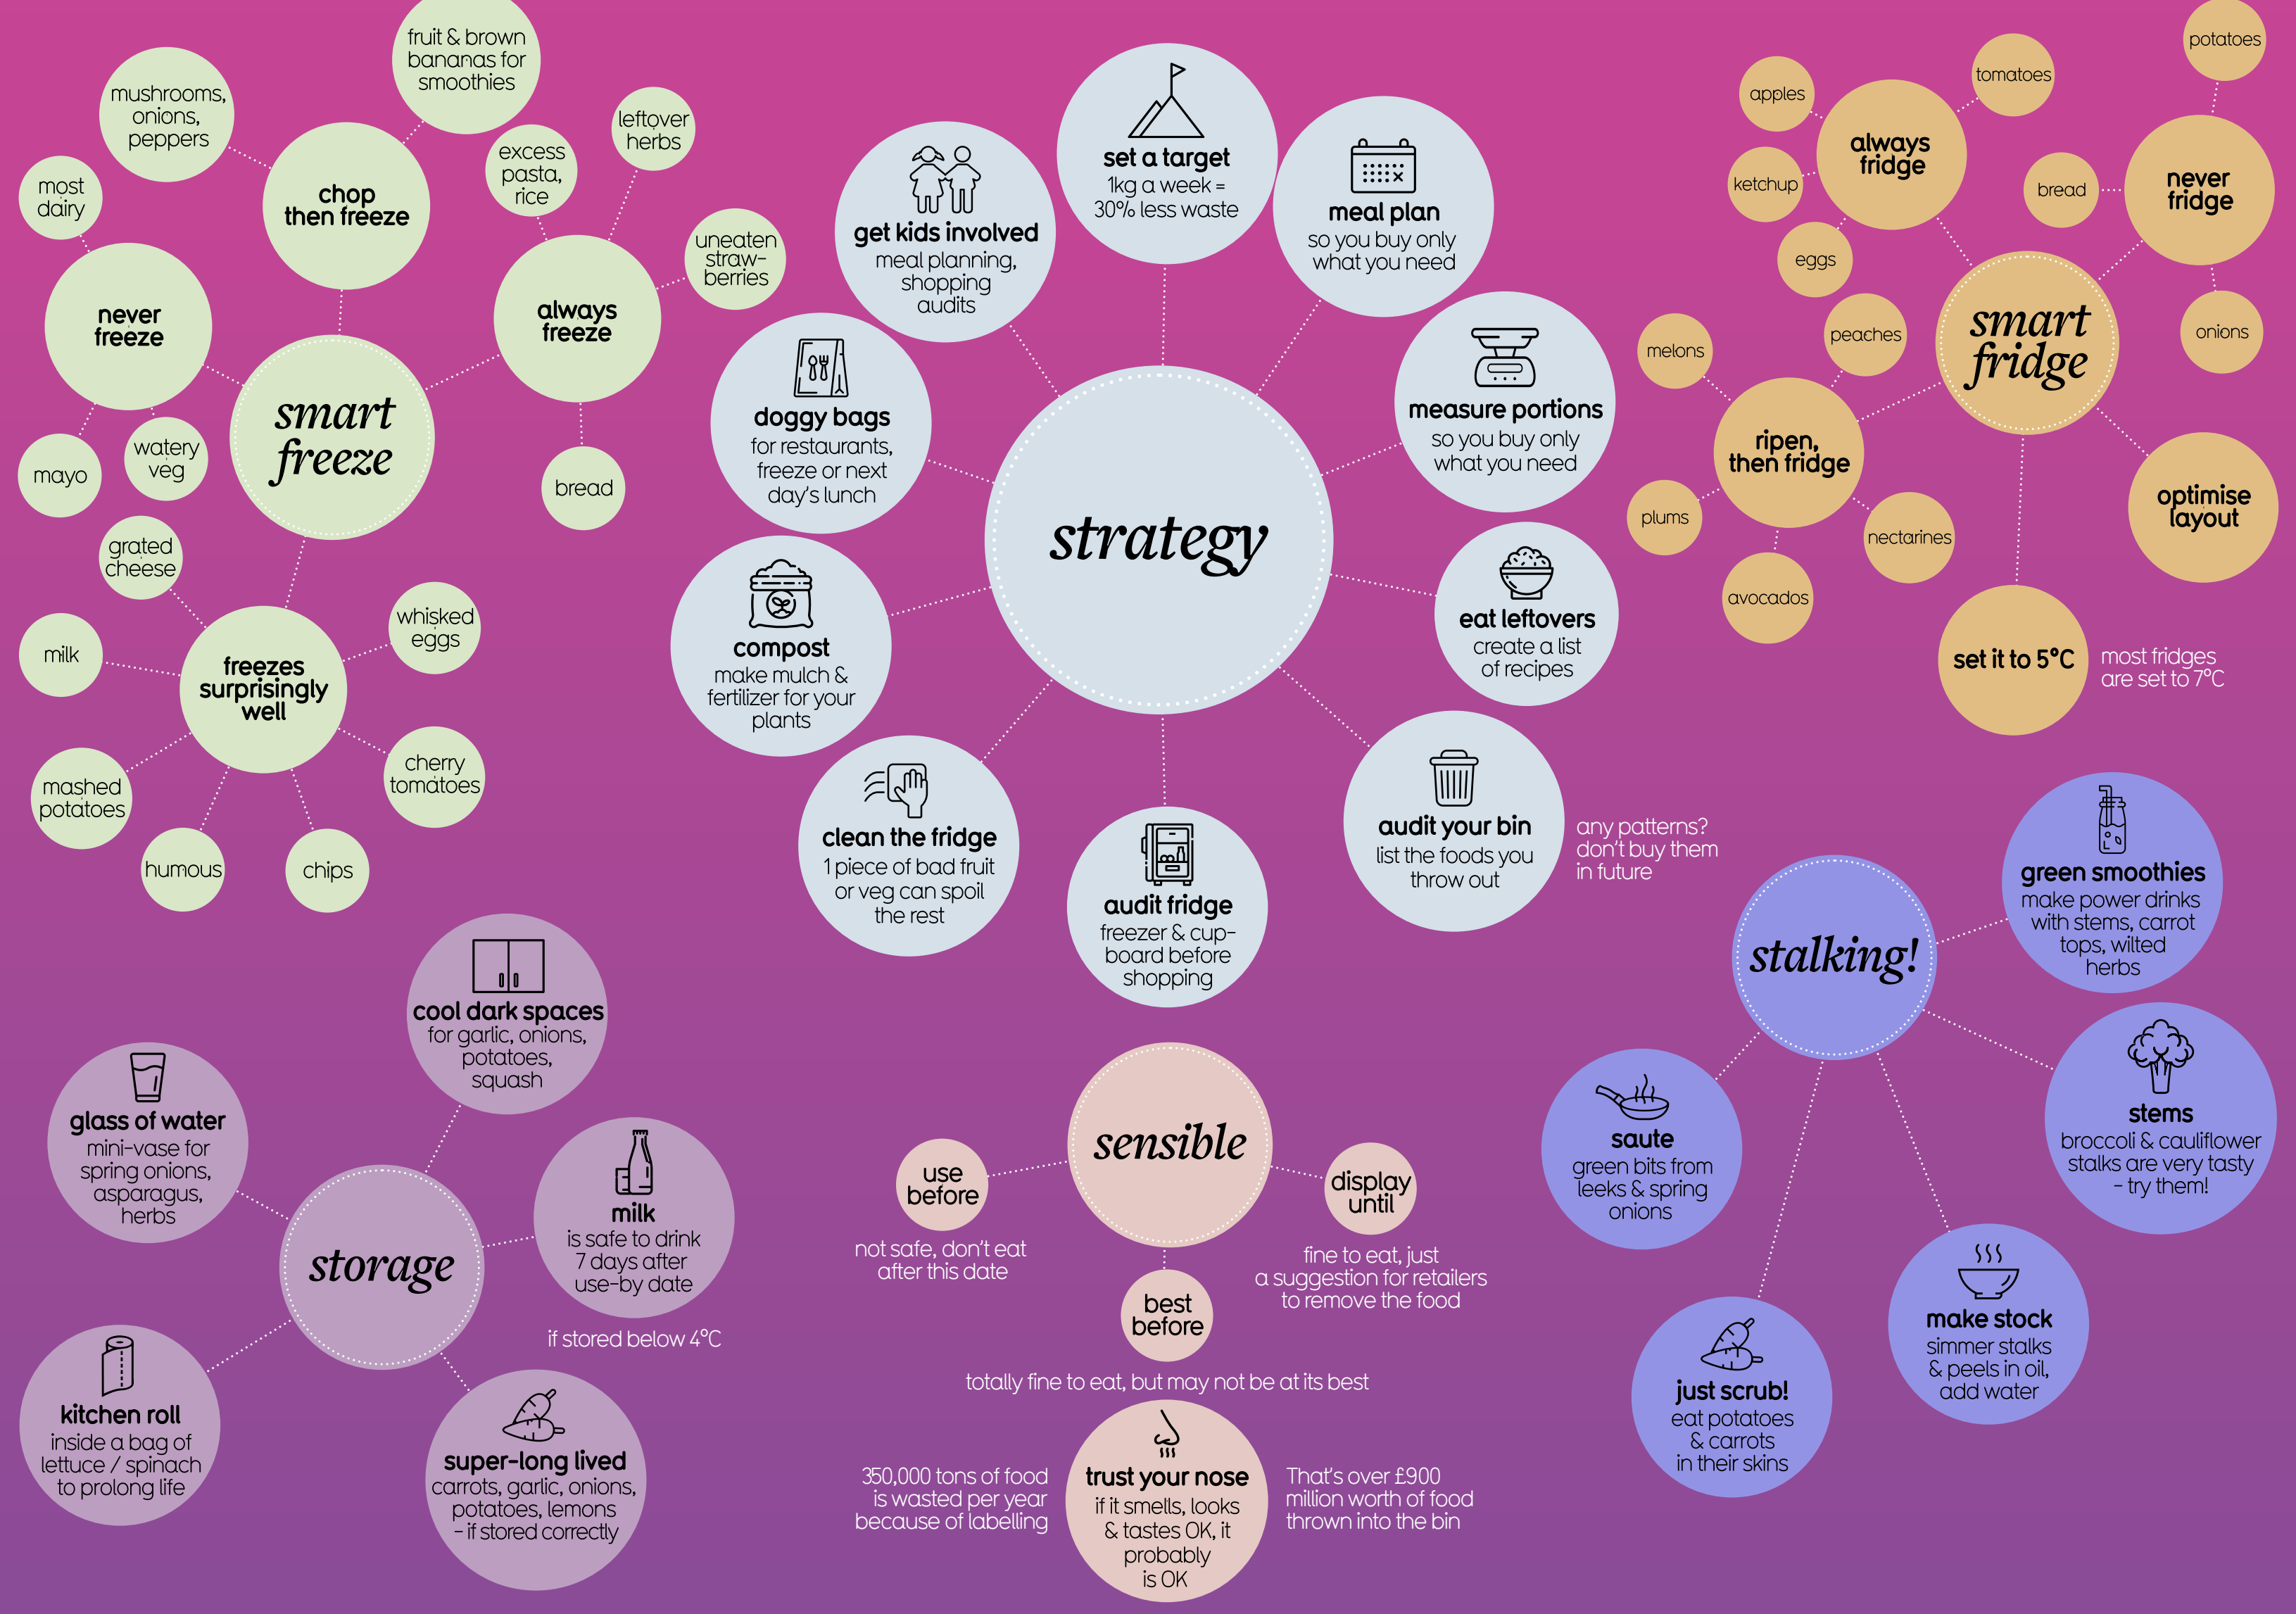

MILLION TONNES OF FOOD DISCARDED EVERY YEAR

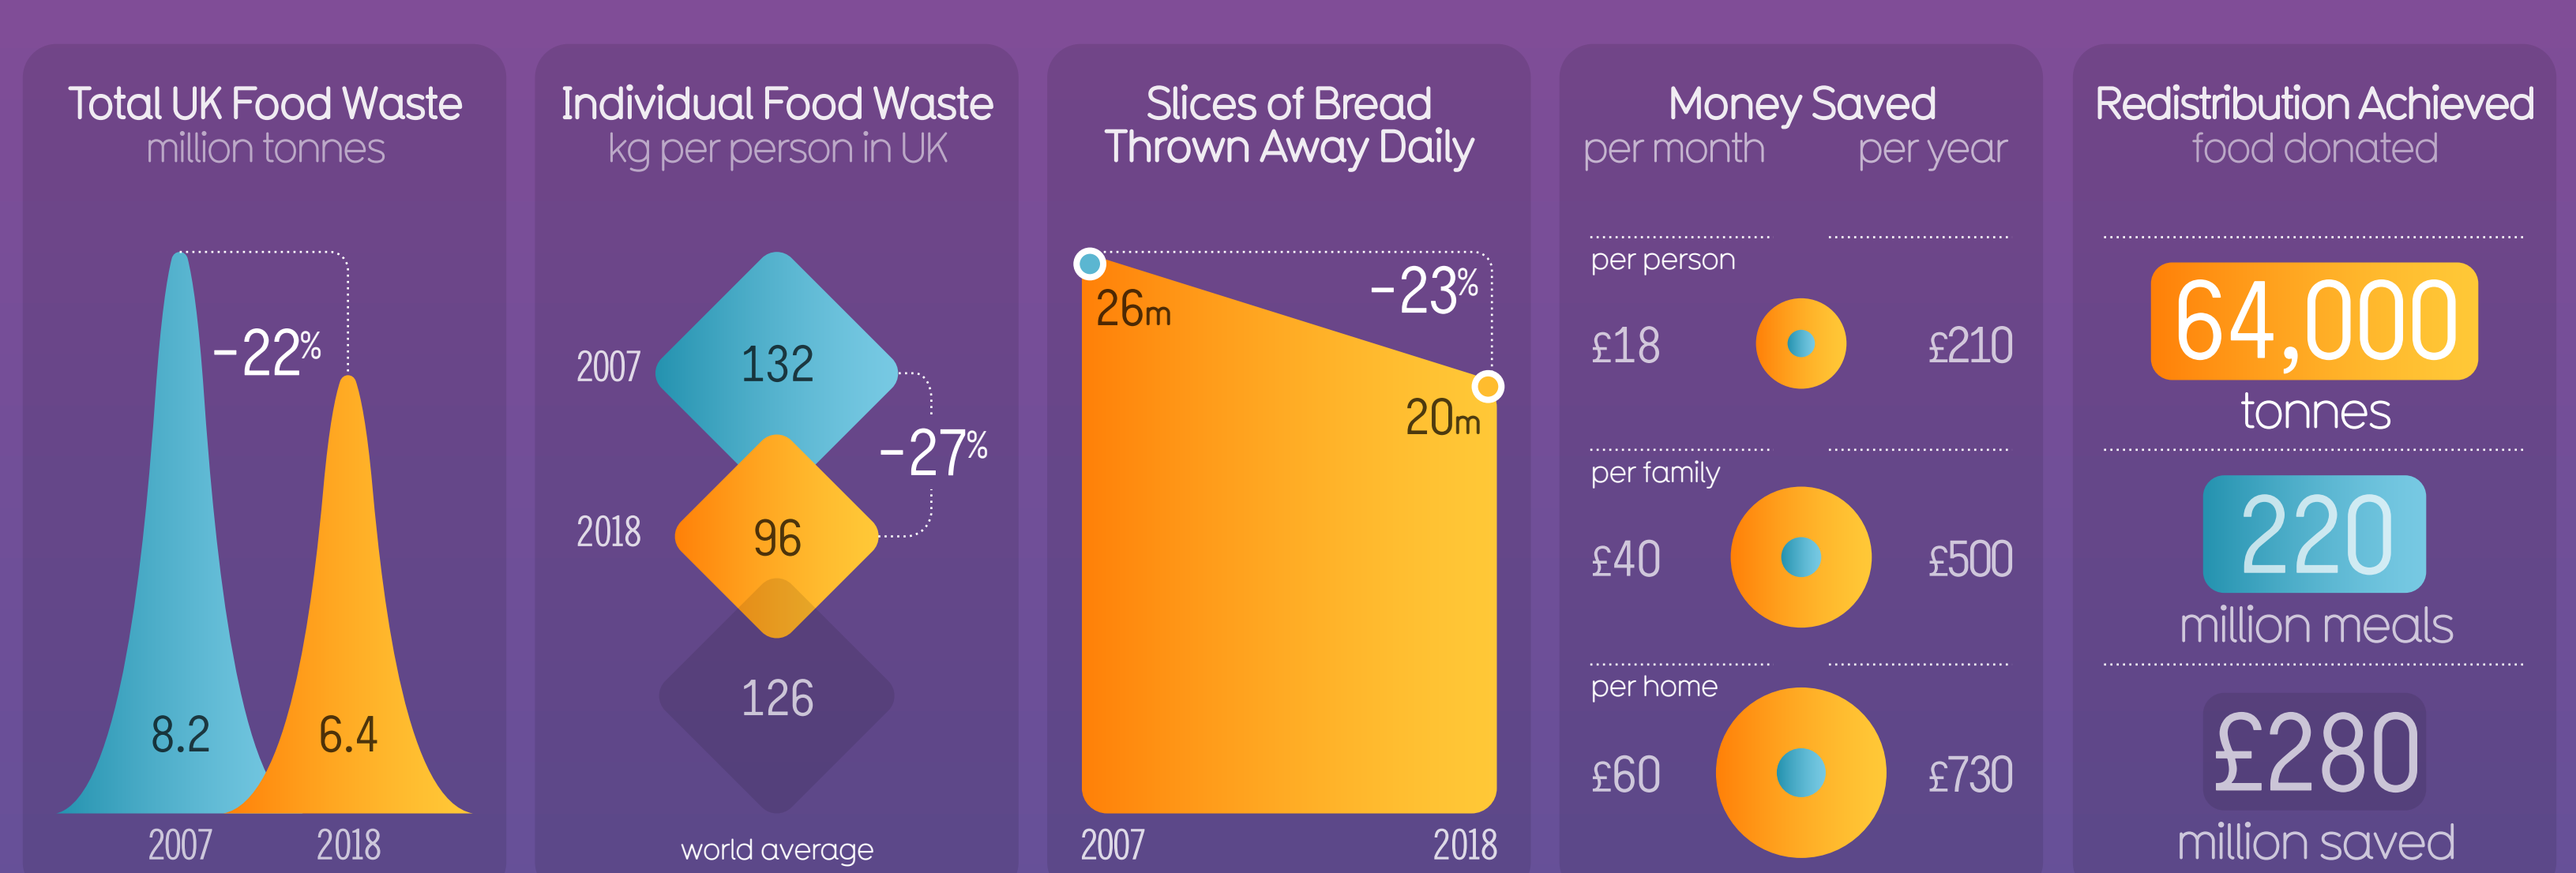

What drives household waste?

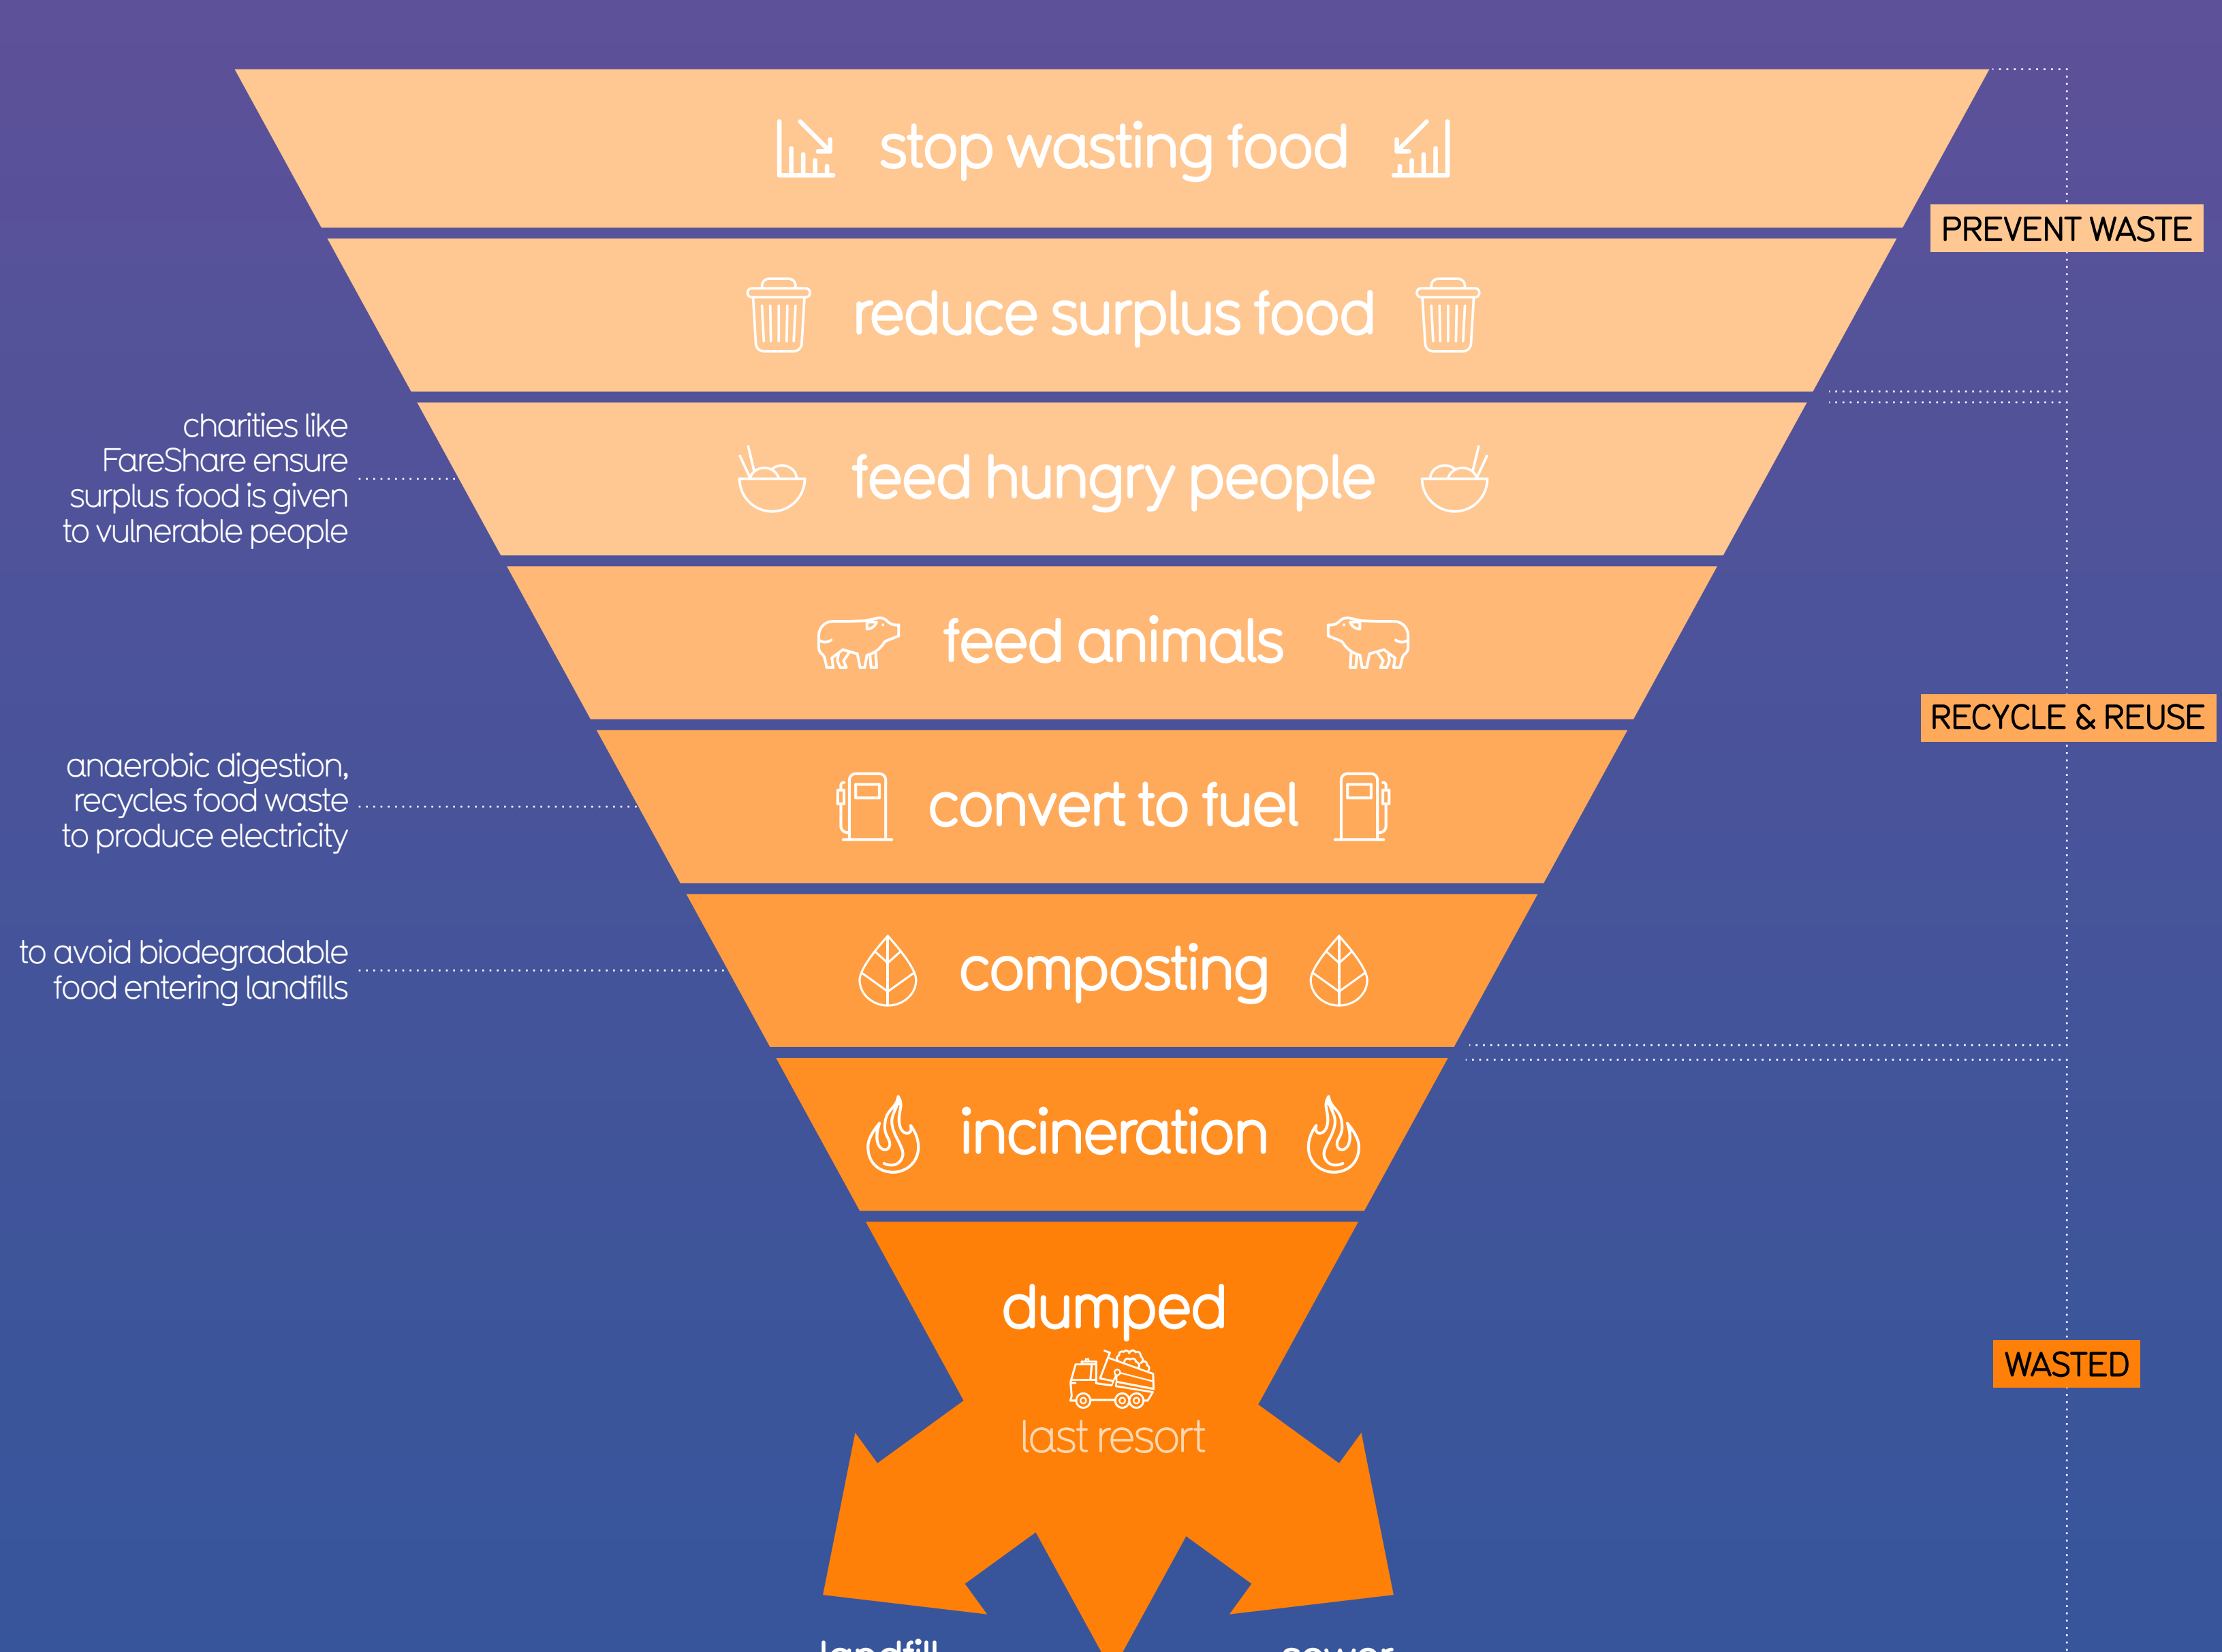

What can we do? everyday tips & tricks

The Good News? We're Already Reducing Waste in the UK

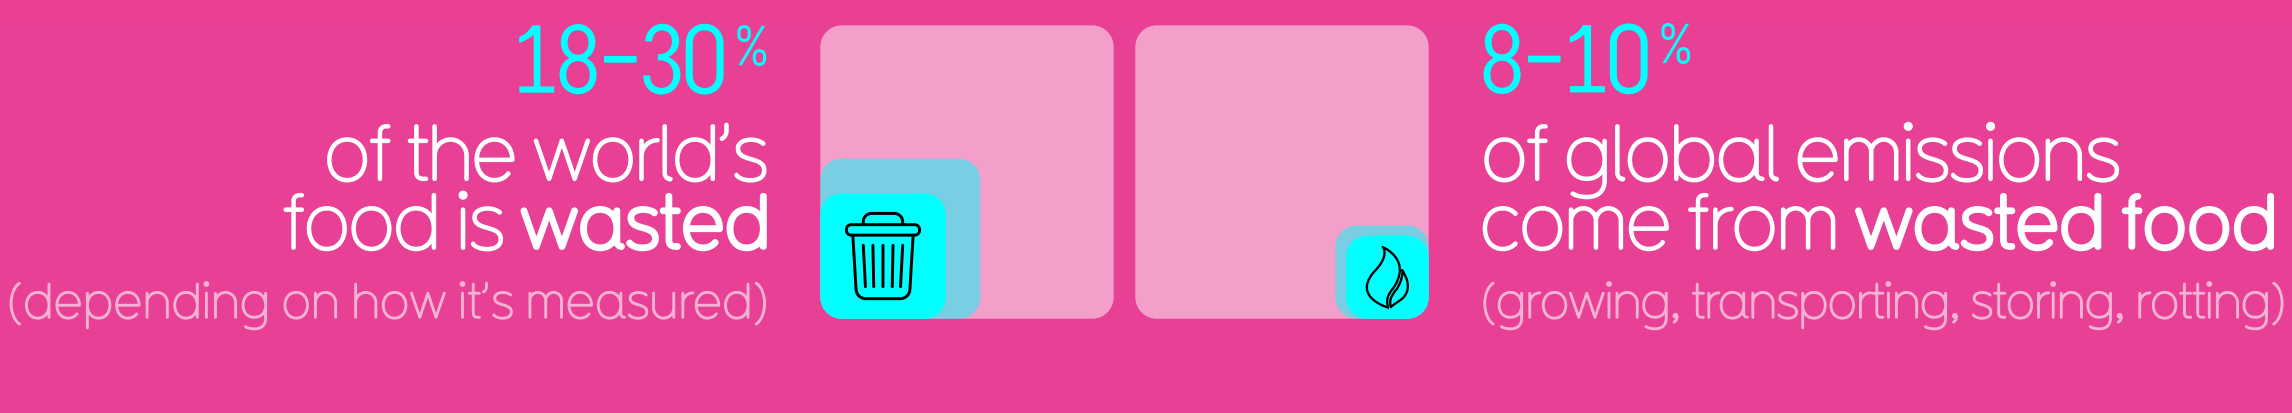

How can we keep fixing it?
